

BASALTINA SLAB

Basaltina is a hard, black, volcanic rock formed from the rapid cooling of lava at the earth's surface. Basaltina has been quarried for millennia, and was widely used during the Roman Empire for a variety of construction purposes. It is a fine grained stone, with shades that vary between black and grey. We stock Basaltina in both 2cm honed slabs and 24" x 24" honed field tiles to match. Imported from Italy.

NOTES

- ¹ Minimally sensitive to acids. Contact with acidic foods should not cause etching.
- ² Regarding Fiberglass Mesh Backed Stones for installation in wet areas, consult your fabricator for recommended installation method. Options include, but are not limited to complete removal of fiberglass mesh backing (where applicable) or installing with epoxy setting material. Any decision to install contrary to most current Marble Institute of America Dimension Stone Design Manual practices is solely at buyers discretion and risk.
- ³ If slab has fiberglass mesh backing, Mapei Kerapoxy 410 recommended.
- ⁴ Please see MIA DSDM (Dimension Stone Design Manual) for all installation instructions.
Note: Alternate finishes and thicker formats available on special order.
